

# ROLL-UP SIGNS

LIGHTWEIGHT,  
PORTABLE  
AND TOUGH!

Reflective Roll-up Signs  
are a practical choice for  
traffic signalling.

## EASY TO HANDLE AND TRANSPORT

They're compact when folded so you can **easily transport** several at once.

**Choose your preferred stand**, from Compact Springless or Compact Single Spring for your roll-up signs.

Disassembly is quick and simple, **for easy and safer clean-up** – your crew can get on and off the road quickly.

UNLIKE MANY OTHER SAFETY SIGNS, ROLL-UP SIGNS ARE **LIGHTWEIGHT AND EASY TO TRANSPORT AND DEPLOY.**

## ONE SIGN - SO MANY MESSAGES

You can **change your message** quickly and easily with **OVERLAYS!**  
**Combine information** on a single sign.

If your jobsite changes location, **just change the overlay** to keep your warnings current.

SafeZone Series Distance Overlays    SafeZone Series Lane Overlays

SafeZone Series Arrow Overlay

With **dozens of overlays to choose** from, they're highly versatile.

**End-to-end velcro** ensures a **strong attachment** to sign faces.

## CUSTOM SIGN SHOP

If you need a Sign and can't find it, **WE'LL MAKE IT!**

Our custom sign shop is geared up and ready to meet your needs. If you can't find the sign you need, don't worry because we can make it for you! We also keep a wide range of standard signs in stock.

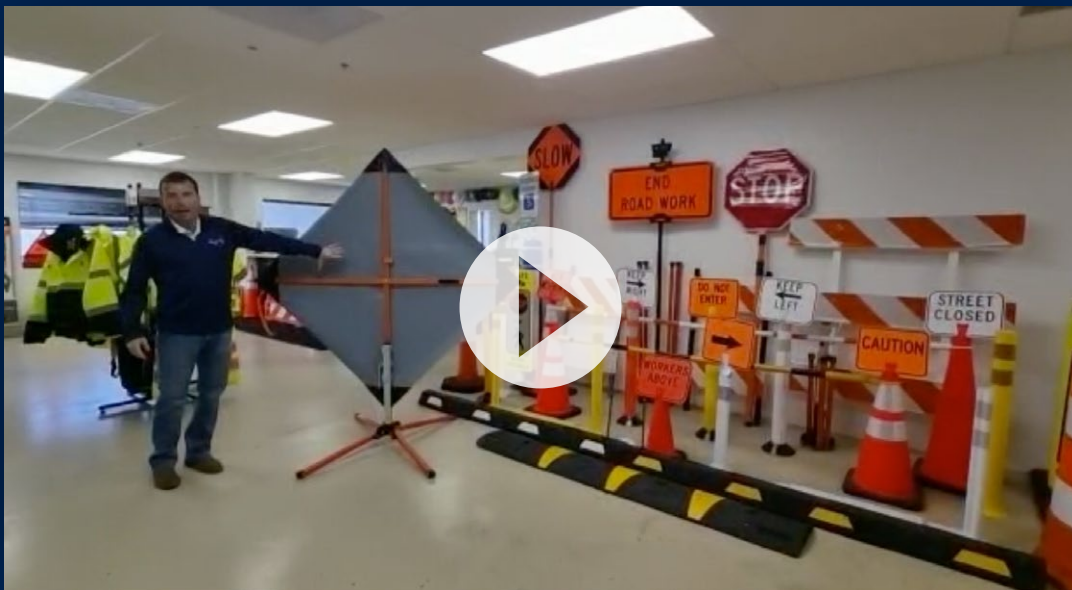

## TOUGH ENOUGH FOR ANYTHING

- Roll-up safety signs can be wiped and cleaned, **to keep your signs looking newer longer.**
- **The ink technology is durable** and is not affected by environmentally safe cleaning solutions.
- Available in marathon sheeting, they are fade and UV resistant for **extended outdoor life.**

**Available in  
Marathon Sheeting**

## ROLL-UP SIGNS POCKETS

95TSS offers a sewn pockets configuration to meet your needs: simply insert the crossbrace into the horizontal pockets to deploy.

## STANDS FOR ROLL-UP SIGNS

Display your temporary road signs quickly and easily with a Roll-up Signs Stand. Our stands are constructed from durable steel components with high-strength aircraft aluminum legs to prevent twisting, turning, distorting, and delamination due to adverse weather or temperature fluctuations.
